

**FOR IMMEDIATE RELEASE:**

## **ONYX SPECTRUM TECHNOLOGY ACQUIRES TELTONE\* PRODUCT LINE**

Boston, MA, August xx xx, 2022 – Onyx Spectrum Technology is pleased to announce that it has acquired the TelTone secure communications product line from Industrial Defender.

Used extensively in the critical infrastructure of the utility industry, the Teltone products provide reliable and secure communication to utility substations. Utilities continue to need equipment that can withstand harsh environments, provide robust communications for many years and comply with cyber security regulations. This acquisition will provide access to support, repair and certification of the install base and existing inventory, thereby enabling utilities to keep their critical infrastructures running smoothly and provide a pathway for the development of the next generation of Teltone line of secure communications network products.

Onyx Spectrum Technology's expertise in providing long-term support and sustainment for communication products in critical infrastructure environments ensures that utilities who rely on the TelTone products for connection to remote substations are accessible only through a standard analog telephone connection will continue to have those products supported.

"The Teltone acquisition positions Onyx Spectrum Technology to not only provide more services to the current users of the TelTone products, translating our expertise into the power delivery / utility market and expands our work developing the next generation of secure communications products." Adrienne R. Benton, President & CEO of Onyx Spectrum said. "As a black, woman-owned engineering and information technology firm, we are excited to have the opportunity to develop relationships with companies in the utilities sector to support their critical infrastructures."

### **About Onyx Spectrum Technology:**

Onyx Spectrum Technology, Inc. is a multidisciplinary IT Professional Services and Engineering Services Firm headquartered in Boston, MA, with the Engineering Division based in Lawrence, MA. Onyx Spectrum Technology addresses the large and complex compliance, organizational, information management and sustaining engineering issues businesses and government agencies face.

Onyx Spectrum Legacy Solutions is the Division that provides long-term support and sustainment for embedded legacy products critical to long-lasting applications in the utility, defense, government and OEM sectors for Communications Systems, Embedded Electronics, Signal Processing Electronics and Systems and Electro-Optical Systems, addressing both Legacy Support and Legacy Sustaining issues.
